

DeForest Amateur Radio Club Net Control Procedure

This is Net Control Station _____ calling the DeForest Amateur Radio Club net.

My name is _____, and I am located in _____.

We hold this net each Thursday evening at 8:00 PM on this repeater, which is owned and operated by the DeForest Amateur Radio Club.

If communication on the repeater is not possible, the net will be held on 147.00 MHz simplex.

Do any of the club officers have announcements for the net? (drop the carrier, listen for a few seconds).

Does anyone else have announcements for the net? (drop the carrier, listen for a few seconds).

When you check-in please give your call, your name, your present location and state what kind of power source you are using for your transceiver.

We will check-in mobile stations first, followed by short time stations and then everyone else.

All mobile stations ONLY, please check in now. (Ask mobile stations for comments in order they checked in, before continuing with the net, so they may check out once they have reached their destination.)

All short time stations, please check in now. (Do not ask short time stations for comments, that is the idea of a short time station.)

Anyone wishing to check-in, please do so now. (Drop the carrier, log all check-ins.)

We will not recall all check-ins and ask for your comments (call each station, in the order of check-in.)

(After recalling all check-ins, ask for additional check-ins, and for additional comments.)

Is there any further business for the DeForest Amateur Radio Club net, if so call now. (Drop carrier and listen for further business.)

Since there is no further business for this net, the net is closed at _____ PM with (number) of check-ins.

This is _____ returning the repeater to normal service.
